AI Agent Product Catalog

Updated: May 7, 2025

1 Customer Care Chatbot

1.1 Overview

Agent Name: Customer Care Chatbot
Description: AI chatbot automating real-time customer inquiries, replacing routine support tasks.

1.2 Features

- Order Status Inquiry: Retrieves delivery info via order number.

- Return/Exchange Guidance: Details product-specific return policies.

- Store Location/Hours: Suggests nearest store by customer location.

- Account/Password Support: Guides password reset process.

- Human Escalation: Transfers to agents on specific keywords.

1.3 Characteristics

- Natural Language Understanding (NLU).

- Multilingual (Korean, English).

- Continuous FAQ learning.

- CRM API integration.

1.4 Applicable Industries

- E-commerce

- Retail

- Financial Services (non-sensitive)

- Healthcare (non-diagnostic)

1.5 Use Cases

- "When' s my order?" → "Hong Gil-dong, expected May 9."

- "Return process?" → Provides procedure and link.

- "Speak to human." → Escalates to agent.

1.6 Benefits

- Automates 1,000 daily inquiries, cuts 2 staff.

- 40% faster responses.

- 12% less customer churn.

1.7 Target Customers

- High-volume B2C businesses.

- Enterprises with 5+ support staff.

- Multilingual support needs.

1.8 Tags

Chatbot, Customer Support, FAQ Automation, NLU, Multilingual, API

1.9 Pricing

Monthly: ₩2,000,000 (10,000 responses), usage-based billing.

2 Voice AI Callbot

2.1 Overview

Agent Name: Voice AI Callbot
Description: Voice AI automating phone call handling, FAQs, and escalations.

2.2 Features

- Call Reception: Recognizes speech (STT).

- FAQ Responses: Answers delivery, hours, service queries.

- Routine Tasks: Manages callbacks, order verification.

- Human Escalation: Auto-transfers to agents.

- Conversation Logging: Saves and summarizes calls.

2.3 Characteristics

- Twilio Voice API.

- Korean, English STT.

- Basic TTS (premium optional).

- Call recordings and summaries.

- Low-bandwidth stability.

2.4 Applicable Industries

- Financial Services (non-sensitive)

- Manufacturing After-Sales

- E-commerce Support

- Healthcare Reservations

2.5 Use Cases

- "Delivery time?" → "Order 12345, May 10."

- "Human agent." → Transfers call.

- "Request callback." → Logs request.

2.6 Benefits

- Automates 300 calls/day vs. 30 manually.

- Call time: 5 min to 1 min.

- Less agent fatigue, consistent CS.

2.7 Target Customers

- 100+ daily call businesses.

- Nighttime unmanned support.

- Inbound call centers.

2.8 Tags

Per-document: ₩50,000; Monthly: ₩2,000,000 (50 documents).

4 Internal Knowledge Search AI

4.1 Overview

Agent Name: Internal Knowledge Search AI
Description: AI searching internal documents, manuals, FAQs for real-time answers.

4.2 Features

- Document Upload: Indexes PDF, PPT, Word, text.

- Natural Language Search: Extracts relevant passages.

- Source Attribution: Cites original documents.

- Continuous Updates: Auto-indexes new files.

- Analytics Dashboard: Logs searches, trends.

4.3 Characteristics

- LangChain + FAISS vector search.

- Role-based access control.

- Web UI, API support.

- Document pre-processing.

4.4 Applicable Industries

- Enterprise Knowledge Management

- Consulting, Legal, IT

- Hospital Protocols

- Manufacturing Manuals

4.5 Use Cases

- "Travel expense process?" → Extracts procedure, link.

- "API docs?" → Provides latest dev docs.

4.6 Benefits

- 70% less search time.

- Fewer informal inquiries.

- Reduced knowledge gaps.

4.7 Target Customers

- 1,000+ document organizations.

- Mid/large enterprises, public sector.

- 1+ hour daily document searches.

4.8 Tags

Knowledge Search, Document Search, LangChain, Vector DB, Search Bot

4.9 Pricing

Monthly: ₩3,000,000 (50 users), user-based pricing.

5 Meeting Summary & Action AI

5.1 Overview

Agent Name: Meeting Summary & Action AI
Description: AI summarizing meeting recordings, extracting actionable tasks.

5.2 Features

- Recording Upload: Processes Zoom/Teams audio.

- Content Summary: Captures key points.

- Action Item Extraction: Identifies tasks, assignees, deadlines.

- Workflow Integration: Syncs to Notion, Slack, Trello.

- Report Generation: Creates PDF summaries.

5.3 Characteristics

- Automated note creation.

- Multi-turn summary optimization.

- STT-to-summary pipeline.

- Workflow API support.

5.4 Applicable Industries

- Consulting, IT Projects

- Global Teams

- Remote/Hybrid Work

- VC, Startups

5.5 Use Cases

- "Summarize meeting." → PDF summary, task list.

- "Assignee: Hong Gil-dong, Deadline: May 10, Task: API."

5.6 Benefits

- 90% less note-taking time.

- Zero missed action items.

- Instant leader feedback.

5.7 Target Customers

- 5+ weekly meeting teams.

- Task tracking challenges.

- Project-based teams.

5.8 Tags

Meeting Summary, Action Items, Automation, STT, Notion, Slack

5.9 Pricing

Per-meeting: ₩100,000; Monthly: ₩1,000,000 (20 meetings).

6 Competitor Intelligence AI

6.1 Overview

Agent Name: Competitor Intelligence AI
Description: AI monitoring competitor news, SNS, patents, disclosures in real-time.

6.2 Features

- Keyword Registration: Tracks competitor terms.

- Data Collection: Gathers news, blogs, SNS.

- News Summarization: Summarizes relevant articles.

- Risk Alerts: Flags negative issues.

- Report Generation: Weekly/monthly PDF reports.

6.3 Characteristics

- LangChain + OpenAI summarization.

- RSS, web crawling support.

- Sentiment analysis.

- Email, Slack, Webhook alerts.

6.4 Applicable Industries

- B2B Manufacturing

- Venture Capital

- Research Teams

- Strategic Planning

6.5 Use Cases

- "Samsung: 3 negative articles."

- "ABC launched AI solution."

6.6 Benefits

- Replaces manual intelligence.

- Early risk detection.

- Faster decisions.

6.7 Target Customers

- 1–3 member strategy teams.
- ₩50B+ manufacturers.
- Weekly competitor reports.

6.8 Tags

Competitor Analysis, News Summarization, Sentiment, Research Bot

6.9 Pricing

Keyword-based: ₩500,000/month (5 keywords), extra keyword fees.

7 Supply Chain Risk Monitor AI

7.1 Overview

Agent Name: Supply Chain Risk Monitor AI
Description: AI detecting supplier risks like strikes, ESG issues.

7.2 Features

- Supplier Registration: Tracks listed suppliers.
- Data Monitoring: Scans news, government data.
- Risk Detection: Identifies strikes, closures, ESG.
- Comparative Analysis: RAG-based industry cases.
- Report Generation: Supply chain risk reports.

7.3 Characteristics

- NLP, crawling event detection.
- Industry benchmark data.
- Webhook, Slack integration.
- Weekly reports, real-time alerts.

7.4 Applicable Industries

- Manufacturing
- Logistics
- Food, Pharmaceuticals
- Global Supply Chains

7.5 Use Cases

- "Factory A fire: Delivery delays."

- "Supplier B strike reported."

7.6 Benefits

- Prevents supply chain disruptions.

- Early response avoids losses.

- Stronger ESG compliance.

7.7 Target Customers

- 50+ supplier companies.

- Global supply chains.

- ESG report needs.

7.8 Tags

Supply Chain, SCM, Risk Detection, ESG, Monitoring

7.9 Pricing

Supplier-based: ₩1,000,000/month (20 suppliers).

8 Org Sentiment Analyzer

8.1 Overview

Agent Name: Org Sentiment Analyzer
Description: AI analyzing email/messaging logs for organizational sentiment.

8.2 Features

- Log Upload: Processes Slack/Teams logs.

- Sentiment Analysis: Detects positive/negative tones.

- Trend Extraction: Identifies keywords, themes.

- Anomaly Detection: Flags negative patterns.

- Reporting: Team/department sentiment scores.

8.3 Characteristics

- GPT-based sentiment analysis.

- Team-level comparisons.

- Admin-only dashboard.

- Privacy guideline compliance.

8.4 Applicable Industries

- Enterprise HR

- Startups

- Public Institutions

- Multinational Corporations

8.5 Use Cases

- "Team B: 'Overtime,' 'unfair' rising → Intervene."

- "Sentiment: 78 to 65 in 3 months."

9 Investment Risk Analyzer AI

9.1 Overview

Agent Name: Investment Risk Analyzer AI
Description: AI analyzing financial, news, reputation data for investment risks.

9.2 Features

- Company Input: Analyzes target company.

- Data Collection: Gathers news, disclosures, financials.

- Risk Detection: Identifies negative events.

- Financial Health: Evaluates stability.

- Reporting: Summarizes risks, benchmarks.

9.3 Characteristics

- Real-time crawling, financial analysis.

- NLP negative event detection.

- Competitor benchmarking.

- PDF reports.

9.4 Applicable Industries

- VC, PE, Investment Banking

- M&A Teams

- Asset Management

9.5 Use Cases

- "Company A: 5 negative articles, score 62/100."

- "Debt ratio 2x average → Liquidity risk."

9.6 Benefits

- Less due diligence resources.

- Early risk identification.

- Supports investment decisions.

9.7 Target Customers

- Investment Firms

- Strategy Planning

- M&A Due Diligence

9.8 Tags

Investment Analysis, Risk Detection, Financial Analysis, VC, M&A

9.9 Pricing

Per-analysis: ₩100,000; Monthly: ₩1,500,000 (20 analyses).

10 Employee Onboarding AI

10.1 Overview

Agent Name: Employee Onboarding AI
Description: AI automating new hire onboarding with guidance, queries.

10.2 Features

- Process Guidance: Step-by-step task instructions.

- Document Submission: Collects, validates documents.

- FAQ Responses: Answers new hire questions.

- Training Scheduler: Assigns training modules.

- Progress Tracking: Monitors completion.

10.3 Characteristics

- HRIS API integration.

- Multilingual (Korean, English).

- Customizable workflows.

- Web, mobile access.

10.4 Applicable Industries

- Corporate HR

- Retail

- Manufacturing

- Tech Startups

10.5 Use Cases

- "Submit ID?" → Guides to upload portal.

- "Training schedule?" → Lists modules.

10.6 Benefits

- 60% less HR onboarding time.

- Better new hire experience.

- Ensures compliance.
